

PRESS RELEASE

Waalwijk, 5 June 2009

“RiverGuide” – the new Dutch Predator Fishing Guide website is launched.

The new RiverGuide website has gone online. RiverGuide offers the opportunity to fish for predators from a modern fully-equipped fishing boat on some of the well-stocked rivers of southern Holland.

“RiverGuide doesn’t just offer you an ordinary day’s fishing or just being taken to where there are a few fish and not just a day where only catching fish is important because that would do a disservice to our sport.” says Michel Huigevoort, founder of the website and fishing guide. “Every day is matched to your special requirements whether to suit more experienced anglers or those that are taking their first steps into predator fishing”.

RiverGuide aims at anglers who want to lift their skills to a higher level but also at anglers which are not familiar with predator fishing on the big rivers of Holland. The website is in 3 languages and contains all the information about the guiding service, plus tackle field tests.
